Education and Training

THE TECH ACADEMY Full Stack Software Development | Portland, OR
August 2017 - Oct 2017
>Boot-Camp style career school for Software Development. With 40-hour week training. Graduated 2 months before expected date of December 25, 2017. In this self-paced environment I've learned the Fundamentals of Computer Science, HTML/CSS, JavaScript, C#, ASP.NET, OOP, RDB and Management. Completed projects that are located on GitHub, including work on a LMS Blog, both front-end and back-end.

ART INSTITUTE of PORTLAND Game Design and Business Management | Portland, OR
April 2016-Sept 2016
Did Not Graduate
>Studying game design, I learned the principles of design and aesthetic as well as several 3-D modeling software and an introduction into Web Development with HTML/CSS and JavaScript. Business Management gave me an opportunity to work in groups with other students to develop business plans and requirements, while learning about the industry.

WAYNE SCHOOL of ENGINEERING High School Diploma | Goldsboro, NC
Aug 2007 - May 2011
>STEM high school. I completed college courses while attending and graduated with a diploma and Competent Drafter's Certificate with training in AutoCAD and 3D SolidWorks.

Experience

PROSPER IT CONSULTING Portland, OR - Full Stack Software Developer Intern
Aug 2017- Oct 2017
Completed work on a Blog in which the goal was create CRUD methods for the blog as well as comments on individual blogs.
Blog Features created:
➢ Create and implement a control and subsequent views in which the user could Create, Edit, View, and Delete Blogs in Database with a unique Guid per each blog. In addition, a customer(student) facing display of the created blogs got a beginning implementation. Not yet successfully deployed.
➢ Create, View, Delete Comments in Database in which the Blog Primary Key is used to create comments. The comments would then be displayed using MVC Views as well as Razor V3 syntax to display the information.
➢ Create a one-to-many relationship between a Blog and it's corresponding comments.
➢ Enable creation of blogs with formatted iframe for videos and image tag utilizing HTML, Bootstrap 3, and jQuery.
➢ Utilize existing technologies without addition of external frameworks or languages not present in the (then) current project file.
